International application No. PCT/IT00/00309

## I. Basis of the report

1.	With regard to the <b>elements</b> of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)): <b>Description, pages:</b>							
	1-9		as originally filed					
	Claims, No.:							
	1-2	5	as originally filed					
2.	With regard to the <b>language</b> , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.							
	The	se elements were a	vailable or furnished to this Authority in the following language: , which is:					
			ranslation furnished for the purposes of the international search (under Rule 23.1(b)). blication of the international application (under Rule 48.3(b)).					
		the language of a t 55.2 and/or 55.3).	ranslation furnished for the purposes of international preliminary examination (under Rule					
	With regard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:							
		contained in the int	ernational application in written form.					
		filed together with t	he international application in computer readable form.					
		furnished subseque	ently to this Authority in written form.					
		furnished subseque	ently to this Authority in computer readable form.					
			the subsequently furnished written sequence listing does not go beyond the disclosure in oplication as filed has been furnished.					
		The statement that listing has been fur	the information recorded in computer readable form is identical to the written sequence nished.					
4.	The	amendments have	resulted in the cancellation of:					
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):						

International application No. PCT/IT00/00309

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

- 6. Additional observations, if necessary:
- V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- 1. Statement

# INTERNATIONAL PRELIMINARY

### **EXAMINATION REPORT - SEPARATE SHEET**

Re Section V: Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Prior Art: Reference is made to the following documents cited in the International 1. Search Report

D1: AMERICAN FAMILY PHYSICIAN, 1994, 50/1, 89-96

D2: US-A-5 043 357 D3: EP-A-0 059 441 D4: US-A-4 902 501

Document D1 discloses salicylic acid and trichloroacetic acid separately for treating acne / as exfoliant (p 93). Document D2 discloses topical virucidal compositions containing an alcohol and a carboxylic acid (claims 1 and 17). Document D3 discloses topical compositions (claims 1, 5, 11) comprising a terpene (e.g. menthol) and a ketocarboxylic acid for the treatment of cutaneous injuries (p 4). Document D4 discloses a pharmaceutical composition comprising cholestyramin, antimicrobial agents (hydroxy benzoic acids) in a polymeric suspending/coating agent.

#### 2. Novelty and Inventive Step(Article 33(2) and (3) PCT):

Claim 1 relates to a pharmaceutical composition for topical use comprising in a suitable polymer trichloroacetic acid, 2-hydroxy benzoic acid and  $(1\alpha,2\beta,5\alpha)$ -5methyl-2-(1-methylethyl)cyclohexanol.

As none of the prior art documents disclose a corresponding composition, the subject- matter of claims 1 and dependent claims 2-18 seems to be novel.

In addition, as there is no indication in the prior art to combine these substances and as its (painless) application for the treatment of burns has been shown, the subjectmatter of claims 1-18 also seems to be inventive.

For the same reasons, claims 19-25, relating to a process for the preparation of said composition, seems to be novel and inventive.

### Industrial Applicability (Article 33(4) PCT): 3.

The subject-matter of the claims concerns pharmaceutical compositions and a process for their preparation which are industrially applicable.
